

NHBRC Inspection Services

DDP has a team of expert Building Inspectors who conduct on-site inspections for Banks for:

- The approval of a building loan or additions to an existing subject property, or
- To ensure that completed workmanship is according to industry standard.

DDP is called upon by Banks to inspect a subject property for the approval of a building loan from the Bank, to disburse payments on the building progress, ensuring that the building is being constructed according to approved plans and appropriate code requirements.

Our Building Inspectors also work with the National Home Builders Registration Council (NHBRC), which is a regulatory body of the home building industry. Their goal is to protect consumers who have been exposed to contractors who deliver housing units of substandard design, workmanship and poor quality material.

DDP Building Inspectors ensure that workmanship is completed according to accepted standards and will report any building code violations which are determined during such inspections.
